

# Updating the New Data Products Release to Public Inventory

Historically, the ASDC provided monthly updates to the New Data Products Released to Public Inventory. As the ASDC did not provide any updates since July 2022, this initiative restarted February 2024.

The Inventory includes information about data products processed by all NASA DAACs. At the end of each month, [REDACTED] summarizes the data and sends it to [REDACTED] and [REDACTED] who use the summary in a monthly meeting with ESDIS. Additionally, the summary is added to Earthdata each month.

With a NASA gmail account, access the Google document provided by [REDACTED]

[REDACTED]: [https://\[REDACTED\]](https://[REDACTED])

## Required Product Data

Only enter information in the sheet named ASDC

The required data and how to source them are listed below:

- Report date: The first Monday of the following month formatted as MM/DD/YYYY.
- Entry ID: The [REDACTED] of the collection including the version at the end
- DOI: The DOI of the collection with “https://doi.org” in front. If it does not have a DOI, enter N/A.
- Version: The version of the product.
- Product type: Either New, Incremental, or Reprocessed.
- Temporal extent: Enter with the format MM/DD/YYYY – MM/DD/YYYY
- Description: The first sentence of the abstract. If the abstract is not listed on its PLM ticket, it should be written at the top of the CMR or DLP page for the collection. (Use the CMR or DLP link on the ticket for quick access.)

At the end of the month, email a notification to [REDACTED] that the monthly update is complete.
